Heritage and experience

Founded in Belgium since 1934, OSTA is an authentic manufacturer of pure wool and man-made fiber rugs. Our name is established by nearly 90 years of masterly excellence and experience in the weaving industry.

We weave to order and keep part of our collection in stock to meet the demand for fast deliveries. The highly skilled in-house design team aspires to reinvent itself and refine the designs of today and tomorrow. Every day, our professional sales team gives the best of themselves and goes above and beyond to meet the clients needs. The entire OSTA team strives to provide the best quality and services for our partnerships around the world.

“100% designed and made in Belgium with natural and eco-friendly materials, striving for quality and perfection every step of the way.”

OUR VISION
THE OSTA TEAM

Knowledge and innovation

Our weaving mill is based in Avelgem, mere minutes away from Oudenaarde, which is Flanders' historical tapestry weaving center. We are proud to continue the fine art of weaving and keep this remarkable legacy alive. Our team aspires to offer the widest possible scope of high-end techniques and textures, ranging from the sophisticated Jacquard to high-end wilton. We achieve luxurious high pile, elegant cut and loop (commonly referred to as Brussels weave), and even intricate high-performance rugs.

The finest materials are selected to weave our products, from natural fibres such as pure wool or cotton to even recycled polyester. OSTA highly values its in-house knowledge, and so the design team joins forces with our skilled master craftsmen to innovate and create the unexpected.

"Our master weavers and motivated team strives daily for the best quality"

WEAVING PLANT
AVELGEM, BELGIUM

Innovation and design

For almost 90 years we have specialized in outstanding Belgian design and innovation. Our highly skilled in-house design team is led by Creative Director Maghalie Doms, whose creative vision draws inspiration from around the world. She believes that all designers have their own signature style, which helps to make our designs unique. The design studio is located in the heart of the showroom. It boasts a tremendous variety of materials, colors, yarns, as well as an extensive library from which to derive inspiration. Every single day, the team strives to reinvent itself and refine the designs of today and tomorrow.

Modular and inspiring

OSTA has a unique showroom concept. Our in-house developed displays are modular and allow constant change. They make our products stand out and lead you through the different designs and textures. Because our showroom is flooded with natural light, you can optimally perceive the colors of each and every piece. Besides that, here we show that all our signature collections are developed with care for quality, ecology and trends. So go ahead and visit our showroom, be inspired.

"In our showroom we present a wide variety of high quality materials, colors, textures and designs."

HARELBEKE, BELGIUM

"Every single day, the team strives to reinvent itself and refine the designs of today and tomorrow."

CREATIVE DIRECTOR
MAGHALIE DOOMS

SUSTAINABILITY

Recycling and ecology.

Sustainability is key in all our actions. We produce partly our own energy by solar panels which are placed on the entire roof of the factory. The remaining of the energy need is bought from an energy supplier which guarantees the origin from fully renewable power sources (wind and solar energy). Our textile waste, paper, cardboard, plastics, pallets, cartridges, batteries and many more are being recycled.

PREMIUM WOOL

Nature and knowledge

Wool is a natural textile fiber and one of the most sought after materials for rug making. Wool rugs are highly durable and perfectly capable of resisting wear and tear of every day use. Wool has a naturally dirt-repelling effect and is easy to keep clean. It is also flame resistant and characteristically retains its shape so that the pile of the rug always rises and doesn't stick to each other.

"Over the years OSTA has kept a strong focus on preserving Belgian design and high quality wool products."

CEO
LUC CLAEYS

EVERLIFE.

Wool and recycled PET

Plastic bottles are a pollution all over our world. A lot of it can be found in our oceans. However it's not just marine life that is suffering. The plastic that we throw away ends up polluting our countryside and waterways, something which causes harm to nature and wildlife everywhere. So, we are repurposing these plastic bottles and turning it into treasure. By combining it with wool we create a strong bond between sustainability and ecology.

"From waste to beauty. Premium wool combined with recycled PET."

EVERLIFE.

CONTEMPORARY

Harmony and simplicity characterize this modern take on rug design. Freshness of colour and purity of style ward off disorder to produce an elegant contemporary look.
