Rugs suitable for disinfection at home

Textile floor coverings with a Home disinfection mark consist of materials that facilitate regular disinfection with alcohol-based household products, securing no rug damage, if following the instructions given below.

Disinfection is possible with the usage of standard household cleaning products in several ways. Use of ethyl alcohol (75%) or Asepsol (5% benzalkonium chloride) is recommended.

INSTRUCTIONS FOR EFFICIENT AND SAFE DISINFECTION

1. While applying disinfection product on a rug, please wear a protective mask and gloves, as well as protective glasses if needed. During and after the disinfection, it is necessary to ventilate the room.
2. The maximum recommended amount of disinfection product is 500ml per square meter of rug.
3. Applying the disinfectant is proposed with a spray bottle or soaked sponge. When using a spray bottle, apply the disinfectant at a 20-30cm distance from the rug. When disinfecting with a sponge, mop the rug surface and leave it to dry completely before using the rug again.
4. When using Asepsol, it is recommended to use a 5% solution. After the disinfection let the rug dry completely before you use it again.
5. In the disinfection process it is necessary to comply with safety measures and application instructions provided by the disinfectant manufacturers.
